DR TRACKER

DRTRACKER

COMPANY PURPOSE

DrTracker empowers Indian doctors and patients with an AI-driven platform to streamline medical management, enhance diagnostics, and ensure quality care and transparency in the system.

PROBLEM

Criteria	Patient	Doctor
Pain Faced	• waiting in queue • difficult getting the right specialist • timely care	• Unknown to patients - being a good specialist • time-consuming - to go through prior records • disjointed system
Addressal of Issue	• Visit to multi-specialist hospitals • Doctor, friends, family or relative - reference • Google Search	• Maintain a file records • get purchase the software - limited storage has a traditional database

SOLUTION

CloudBased platform

- Hosted on AWS India servers for low-latency access

Device Accessibility

- Web dashboard for clinics
- Android/iOS apps for doctors and patients

Integration Ecosystem

- seamless data sharing
- Partner hospitals / clinics
- labs

BUSINESS PLAN

TEAM

Founder: Ashupriya Sadanande with 1.5 years work-ex as software engineer (BTECH IT) and an entrepreneur background

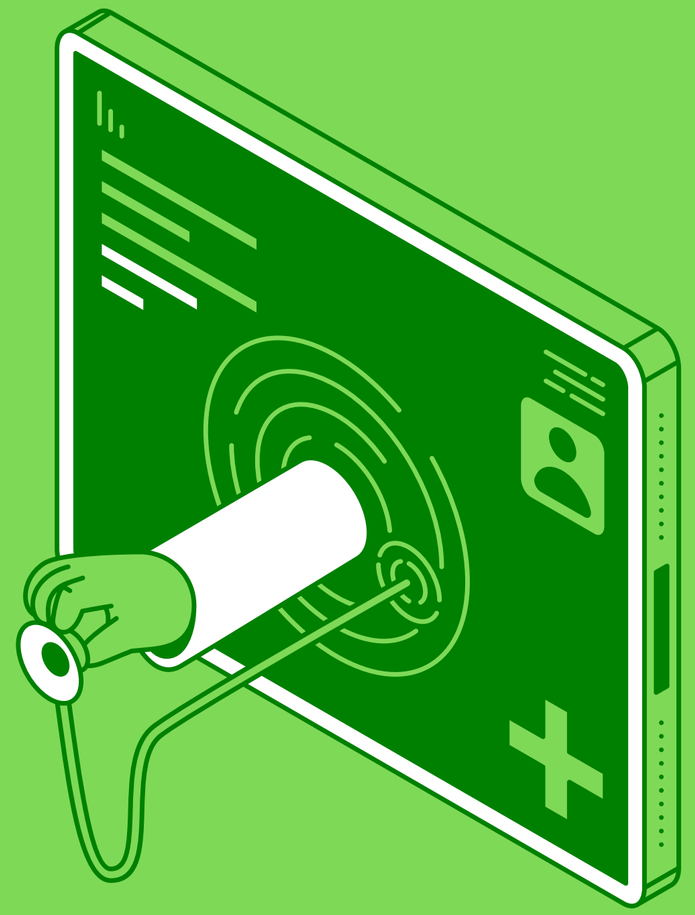

OBJECTIVE

1. **Democratize healthcare access** across urban and rural India.
2. **Empower doctors** with AI-driven efficiency tools.
3. **Enable preventive care** through AI diagnostics and screenings.
4. **Build trust** via compliance with Ayushman Bharat and verified professionals.
5. **Reduce costs** through insurance integrations and transparent pricing.
6. To become **AI-Powerd healthcare platform** for 1.4B Indian

WHY NOW ?

Pre - 2010	**Fragmented, Paper-Driven Systems**
2010 - 2019	**Early Digitization & Telemedicine**
2020 - 2022	**Pandemic-Driven Disruption**
2023 Onwards	**AI & Policy-Led Transformation**

WHY NOW ?

Why is this possible now ?

- **Digital India Initiative:** Government push for digitized healthcare.
- **Post-Pandemic Demand:** 68% urban Indians prefer digital health tool
- **Smartphone Penetration:** 750M+ users in India, enabling app-based solutions.
- **AI Advancements:** Mature tools for diagnostics and predictive analytics.

BUSINESS MODEL

Attractive:

- high smartphone penetration
- demand for telemedicine post COVID-19 68% urban cities

Create Value	Capture Value
• For Doctors: AI-driven diagnostics, customise EHR management, billing automation. • For Patients: AI-analyzed lab reports, verified doctor database, personalized care plans.	• Doctor Subscriptions: ₹999/month (Basic), ₹2,499/month (Premium). • Patient Premium Plans: ₹199/month for priority bookings. • Commission: 10% from lab/pharmacy partnerships.

Deliver

- Onboarding & Support: Free demo trials
- Doctors: Cloud-based SaaS platform with telemedicine integration.
- Patients: Mobile app for appointments, health insights, and treatment tracking.
- seamless care coordination: integrate service(hospitals, clinics, and diagnostic labs) - both doctors and patients

DRTRACKER

Key Partner

- Hospitals & Clinics (integration, referrals)
- Diagnostic Labs (data sharing)
- AI/Tech Providers (R&D collaboration)
- Payment Gateways (secure transactions)
- Government & Health Agencies (Potential partnerships for wider adoption and compliance)

Key Activities

- Develop & maintain DrTracker platform
- Integrate AI Analyzer for lab report insights
- Manage database of licensed doctors
- Marketing & user acquisition
- customer support

Key Resources

- Skilled tech team & AI expertise
- Database of licensed medical professionals
- Partnerships with medical institutions
- Funding for R&D

Value Proposition

- For Doctors:

1. Streamlined EMR with customizable interfaces
2. billing services
3. AI-driven decision support for faster, more accurate diagnoses

- For Patients:

1. AI Analyzer tool to identify, diagnosis & recommend specialists
2. for chronic pain monthly auto-scheduling the appointment give remainder with subscription plan

Relationship

- Subscription based relationships (monthly or yearly plans)
- In-app user support & training
- Feedback loops for continuous improvement

Channel

- Mobile & web application
- Partnerships with clinics/hospitals

Customer Segment

- Doctors & clinics needing a customizable EMR solution
- Patients seeking accurate diagnoses & specialist recommendations
- Healthcare institutions wanting integrated data management

Cost Structure

- Fixed Costs: Tech development, server maintenance, salaries.
- Variable Costs: Marketing, customer support, AI training.

Revenue Streams

- Monthly/Yearly subscriptions from doctors (billing, EMR) - 70% revenue
- yearly subscription plan for chronic diseases monthly checkup form patients (appointment, keep track) - 20% revenue
- Potential commissions from partner labs or pharmacies - 10% revenue

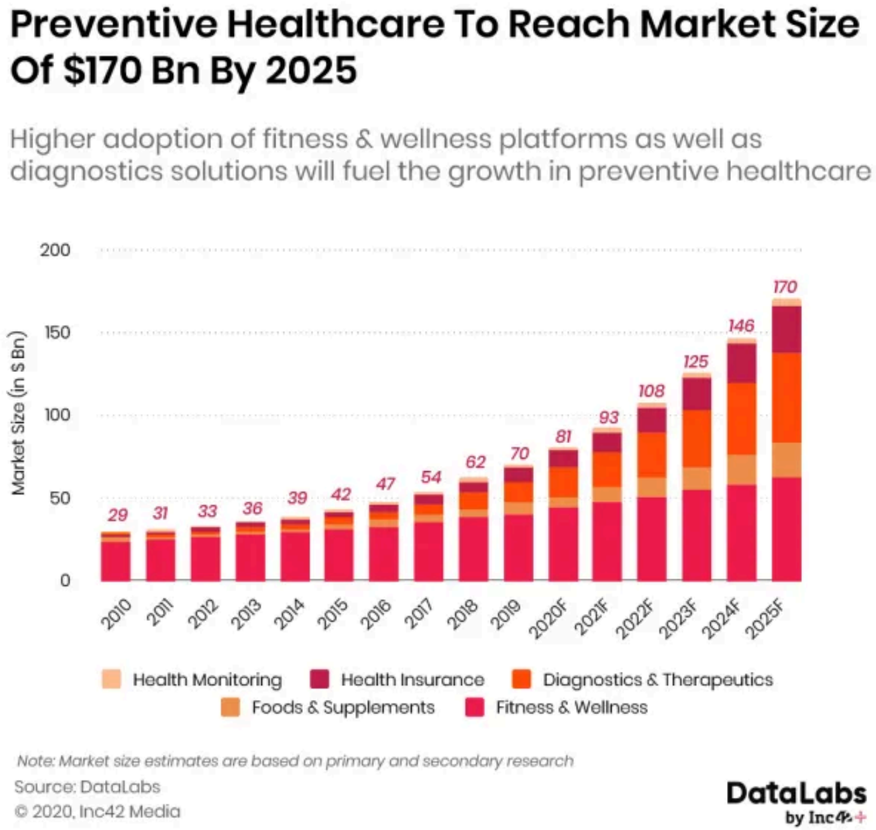

FINANCIALS

Capital Requirements

Seed Funding:
– Q2 2025: Approximately ₹2 Cr
Series A Funding:
– Q3 2026: Approximately ₹10 Cr .

Scenario Analysis & Key Financial Metrics

Metric/Scenario	Best-Case	Base-Case	Worst-Case
Break-even Timing	Q1 2026	Q2 2026	Q4 2026
Annual Sales Revenue (2026)	₹18 Cr (20% higher than base-case)	₹20 Cr	₹12 Cr (20% lower than base-case)
Customer Acquisition Cost (CAC)	Doctors: ₹4,000–₹6,000	Doctors: ₹5,000–₹8,000	Doctors: ₹8,000–₹10,000
	Patients: ₹400–₹600	Patients: ₹500–₹800	Patients: ₹800–₹1,000

FINANCIALS

Financial Projection Table (2025–2028)

Metric	2025	2026	2027
User & Partner Counts			
- Active Doctors	50	500	1,500
- Active Patients	500	5,000	15,000
- Partner Labs	20	50	100
- Pharma Partners	10	30	60
Revenue (Total)	₹2.57 Cr	₹20 Cr	₹50 Cr
Doctor Subscriptions (70%)	₹1.80 Cr	₹14 Cr	₹35 Cr
Patient Subscriptions (20%)	₹0.514 Cr	₹4 Cr	₹10 Cr
Commission (Labs/Pharma) (10%)	₹0.257 Cr	₹2 Cr	₹5 Cr
Costs			
Fixed Costs (Tech, Servers, Salaries)	₹1.5 Cr	₹2.5 Cr	₹3.5 Cr
Variable Costs (Marketing, Support, AI Training)	₹0.64 Cr (25% of ₹2.57 Cr)	₹6 Cr (30% of ₹20 Cr)	₹15 Cr (30% of ₹50 Cr)
Total Expenses	₹2.14 Cr	₹8.5 Cr	₹18.5 Cr
EBITDA	₹2.57 Cr − ₹2.14 Cr = ₹0.43 Cr	₹20 Cr − ₹8.5 Cr = ₹11.5 Cr	₹50 Cr − ₹18.5 Cr = ₹31.5 Cr
EBITDA Margin (%)	(0.43/2.57)×100 ≈ 16.7%	(11.5/20)×100 ≈ 57.5%	(31.5/50)×100 ≈ 63%

EXTERNAL ENVIRONMENT

Category	Factors	Impact	DrTracker's Positioning
Industry Trends	- AI market to hit $17-billion by 2027. - Draft Digital Healthcare Act (2025).	+ Demand for AI tools. – Compliance costs for data localization.	AI Leadership: Proprietary blood report analyzer with 95% accuracy.Early Compliance: Pre-aligned with DPDP Act.
Micro Factors	- Supplier network: 1,000+ clinics, 50+ labs. - CAC reduced to ₹199.	+ Faster onboarding. + Cost efficiency.	Exclusive Partnerships: Thyrocare, HDFC Ergo, and 500+ rural clinics.
Macro Factors	- NDHM adoption (50M digital health IDs by 2026). - 70% rural internet penetration.	+ Telemedicine growth. + Rural user acquisition.	Localized Solutions: App in 10 regional languages + voice-based AI for non-literate users.

EXECUTION- IMPLEMENTATION PLAN

DRTRACKER

Q1 2025

1. Development Team
2. Finalize the prototype
3. establish a strategy partnership

Q2 2025

1. Beta Launch
2. Finalize MVP & Core Features
3. Regulatory Alignment
4. Begin Marketing Outreach
5. raise seed funding

Q1 2026

1. Full Launch in 2 cities - Mumbai & Pune
2. Roll out subscription plans
3. Expansion team
4. scaleup partnership
5. Run campaigns:

Q2 2026

1. Aggressive Market Penetration
2. Revenue Growth & Optimization

Q3 2026

1. addon features
2. launch of a new project- insurance
3. raise series A fund
4. expansion tier2-3 cities

Q1 2027

1. Expansion in Rural cities

Milestone overview

1. Q1 2025: Prototype
2. Q2 2025: Beta launch + ₹2 Cr seed funding.
3. Q1 2026: Full launch in 2 cities + 15 partnerships.
4. Q3 2026: Insurance integration + ₹10 Cr Series A.
5. Q1 2027: Rural dominance with 70+ partnerships.

TEAM STRUCTURE & ROLE

Q1 2025: Foundation & Prototype Development

Team Size: 7–10 members

Role	Responsibility	Headcount
CEO/Founder	Strategic oversight, fundraising.	1
CTO	Tech roadmap, MVP development.	1
Developers	Frontend/backend development.	3
AI Engineer	Build AI analyzer for lab reports.	1
Business Development	Secure partnerships, MoUs.	1
Product Manager	Define MVP features and user stories.	1

Key Activities:

1. Finalize prototype with core features: EMR, AI analyzer, appointment scheduler.
2. Establish **3 strategic partnerships** (1 hospital, 1 diagnostic lab, 1 payment gateway).

Q1 2026: Full Launch & Subscription Rollout

Team Size: 20–25 members

Role	Responsibility	Headcount
Sales Executives	Onboard doctors and clinics.	3
Data Analysts	Track user behaviour and revenue metrics.	2
UI/UX Designer	Improve platform accessibility.	1

Key Activities:

1. Full launch in **Mumbai & Pune** (100+ clinics).
2. Expand to **15 partnerships** (10 hospitals, 5 pharmacies).
3. Roll out subscription plans:
    - Doctors: ₹999/month (Basic), ₹2,499/month (Premium).
    - Patients: ₹199/month for chronic care tracking.

Q2 2025: Beta Launch & Seed Funding

Team Size: 12–15 members

Role	Responsibility	Headcount
QA Testers	Test MVP for bugs and usability.	2
Marketing Specialist	Design campaigns for beta launch.	1
Legal Advisor	Ensure regulatory compliance (NDHM, HIPAA).	1
Customer Support	Handle user queries and feedback.	2

Key Activities:

1. Beta launch in **Mumbai** with 20 clinics.
2. Align with **5 partnerships** (3 hospitals, 2 diagnostic labs).
3. Raise **₹2 Cr seed funding**

Q2 2026: Market Penetration & Revenue Growth

Team Size: 25–30 members

Role	Responsibility	Headcount
Regional Managers	Oversee operations in Mumbai/Pune.	2
Digital Marketers	Run performance ads (Google, Meta).	3

Key Activities:

1. Achieve **₹50 Lakh MRR** with 500+ subscribed doctors.
2. Scale to **25 partnerships** (15 hospitals, 10 labs).

Q3 2026: Insurance Integration & Series A Fundraising

Team Size: 35–40 members

Role	Responsibility	Headcount
Insurance Lead	Partner with insurers (e.g., Star Health).	1
Project Manager	Oversee Tier-2/3 city expansion.	1

Key Activities:

1. Launch **DrTracker Insurance** (instant health policies).
2. Expand to **5 Tier-2&3 cities**.
3. Raise **₹10 Cr Series A** at ₹50 Cr valuation.
4. Grow partnerships to **40+** (25 hospitals, 15 insurers/pharmacies).

RISK ANALYSIS

Data Privacy Concerns

Patients might worry about the security of their personal health information.

Resistance to Technology Adoption:

Some doctors and patients may prefer traditional methods over digital solutions.

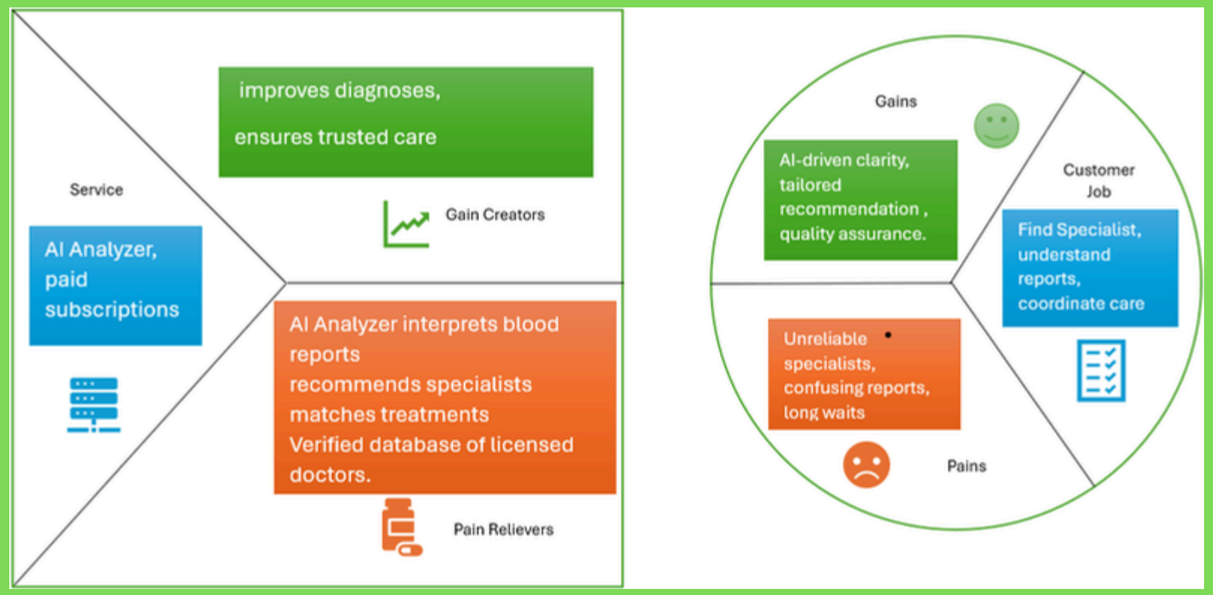

Technical Glitches and Downtime:

Frequent system outages or bugs can frustrate users

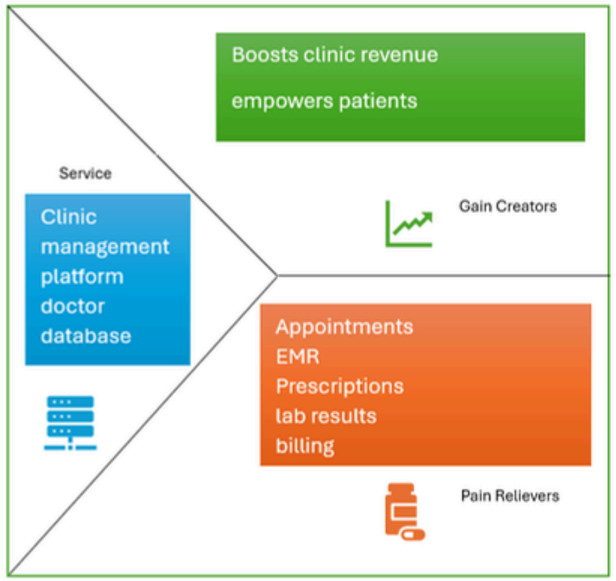

Regulatory & Compliance Risk:

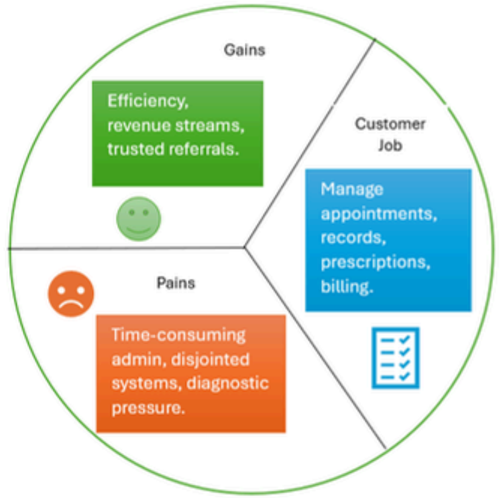

evolving data privacy laws

MARKET SIZE

Indian Healthcare Market

Projected to reach ₹8.6 trillion by 2027

Mumbai Market (Initially targeting city)

population of ~21.6 million

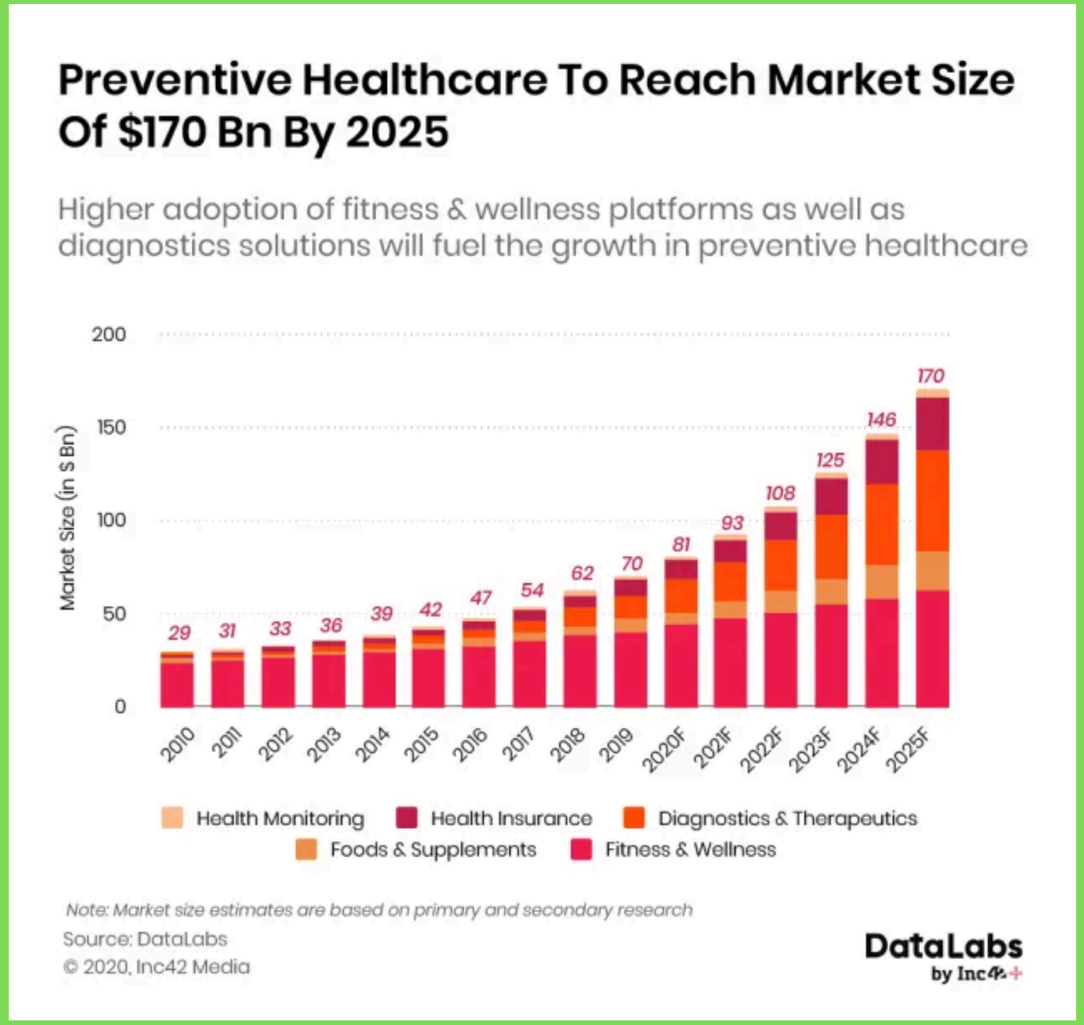

growing demand for accessible healthcare solutions

the prime city for launching a healthcare app

Target Market

Primary Users: Urban professionals, tech-savvy individuals

Secondary Users: Local doctors, hospitals, healthcare practitioners, clinics, and pharmacies

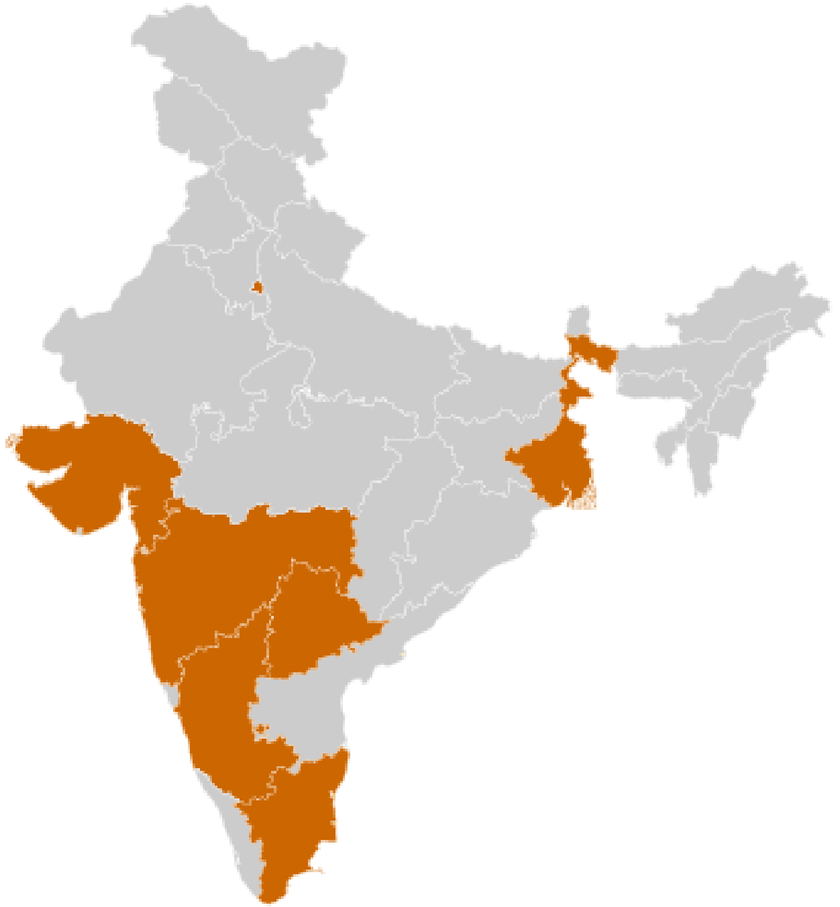

MARKET SIZE

Intial Stage Implementation:

1. **Urban Doctors & Clinics:** 1.3M+ registered allopathic doctors
2. **Tech-Savvy Patients:** 200M+ urban patients with smartphone access

Expansion Stage Implementation:

1. **Rural Healthcare Providers:** 750K+ rural practitioners needing offline-compatible tools and government-compliant platforms
2. **Medical Tourists:** 730K+ patients

Major Healthcare Centers

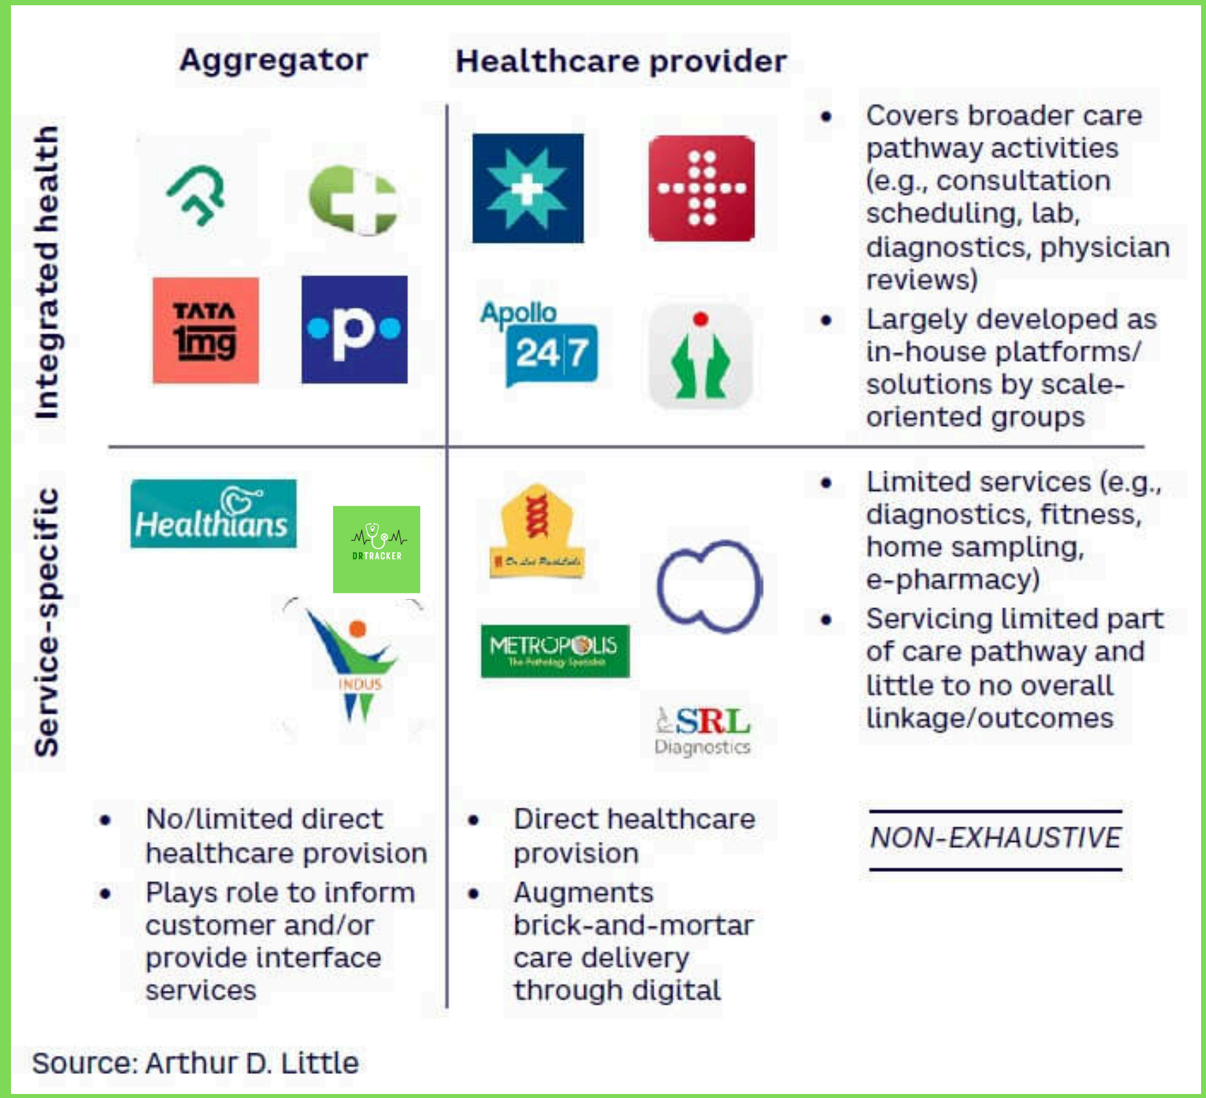

COMPETITION

1mg(Tata)

Lrybrate

COMPETITIVE ADVANTAGE

Feature	DrTracker	Competitors
AI Diagnostics	✔️ Analyzes lab reports, predicts risks	❌ Limited to basic teleconsultations
Unified Workflow	✔️ EMR + billing + diagnostics	❌ Fragmented apps (e.g., Practo Ray)
Specialist Matching	✔️ AI-driven, diagnosis-based	❌ Manual search (location/reviews)
Regulatory Compliance	✔️ Ayushman Bharat integration	❌ Partial adherence

DEVELOPMENT ROADMAP GTM

Phase 1:

Launch in 2 metro cities.

Phase 2:

Expansion in 1-2 tier cities.

Phase 3:

Expand to rural clinics with offline support.

SOLUTION

Use cases - Chronic Management

Patient

Diabetic patient

SALES & DISTRIBUTION MODEL

Sales Strategy

- Direct sale
- Digital Marketing
- Partnership & Collaboration
- Event & Conferences

Distribution Model

- Digital Platform
- Third-Party Integration
- Customer Support Onboarding

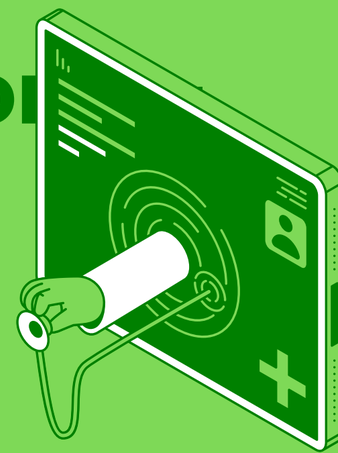

START, STOP, CONTINUE – DRTRACKER

Focus Area	Start	Stop	Continue
AI-Powered Diagnosis	Launch an AI analyzer tool to scan medical records for early risk detection and guide patients to the right specialist.	Relying on manual, slow diagnostic processes that force patients into costly multi-specialist hospital visits.	Iteratively refining our AI algorithms using real-world data and user feedback for greater accuracy and efficiency.
Customizable EMR for Doctors	Offer a free demo and customizable EMR management system to reduce paperwork and streamline clinical operations.	Using outdated portals and cumbersome processes that overburden doctors and their administrative teams.	Continuously enhancing the system with targeted updates based on doctors' needs and real-time feedback.
Transparent Pricing & Value	Introduce clear, tiered pricing (Freemium model, Rs.999 yearly for patients; Rs.5,999 monthly or Rs.70,988 yearly for doctors) to simplify decisions.	Hiding fees or bundling services that don't address the specific requirements of Indian healthcare professionals.	Focusing on delivering value by maintaining affordability and targeted features that serve the unique needs of the market.
